

Design and build drones for environmental monitoring and sustainable precision farming

Team Contract

Andreas Sørensen and Nicholai Skov

University of
Southern Denmark

1 Topics

What are your expectations for this project?

- That we end up with a functional project and in addition get more comfortable with drones in general.

What is your level of ambition?

- If the project is to be evaluated, the ambitions would be 10-12 in terms of grading.

How much time are you willing to invest in the project?

- As much as it take, including spare/free time.

How much time do you expect the other team members to invest in the project?

- In the group each member will invest an equal amount of time.

How should the work be shared between the team members?

- So that each member gets their strong-suit, but in equal amounts.

Should the team select a team leader or not?

- Due to us knowing each other well and having work with each other alot in other projects there is no need for a team leader.

How should the team make decisions?

- By consolidating each member in the group and find an agreed upon solution.

What should be the normal working hours for the team?

- the allotted time as provided in the time plan and if there is need for further work we are flexible with our free time.

What should a team member do if he does not show up one day (legal absence)?

- Work from home at some agreed upon 'assignment'.

What are the consequences of a team member not performing his tasks?

- Hopefully we don't get to that point. The members of the group will ask each other for help if a task seems impossible to do in the allotted time.

What are your concerns regarding the project?

- That we wont be able to reach our goals in time.

What are your expectations regarding communication withing the team (email, sms etc.)?

- Phone calles and Discord meetings.

Are there any other topics which you think should be included in the contract?

- One group member is commuting from Fredercia. So communicating if there are delays in transportation times.
